如何快速做出沒人要用的服務

Intro.

- Micro Web framework
- Single file (3000+)
- WSGI
- No dependencies other than STD
- Routing / Template / Utilities for http-related access
- Lack of ORM, session management support ...

Simple

is better than complex

Bottle Loves decorator

```python
from bottle import route, run

@route('/hello')
def hello():
    return "Hello World!"

run(host='localhost', port=8080, debug=True)
```

get, post, put, delete, hook, error, auth_basic ...

Rethink ...

Micro service

Do not customize it too much...

把最核心的服務早點寫出來，
給使用者玩看看才是王道 ...

Conclusion
